

# Configuring Email Client on Apple Device

---

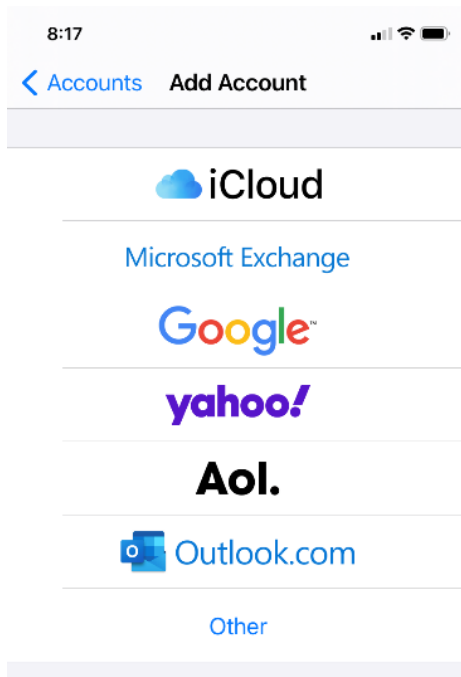

1. To begin, you will need to go to **settings**, then down to **Mail, Contacts, Calendars**, select **Mail**

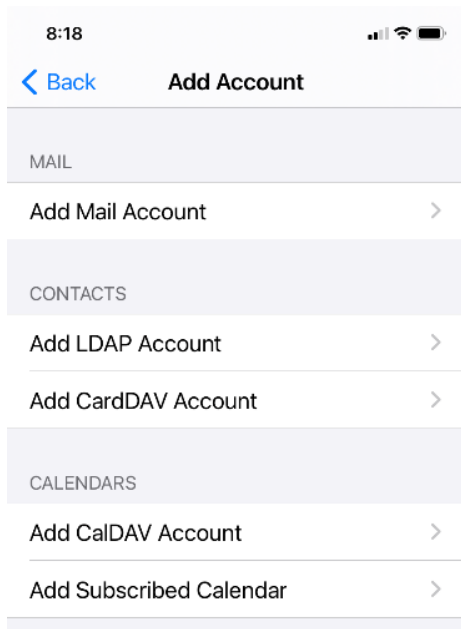

2. Choose **Add Account**

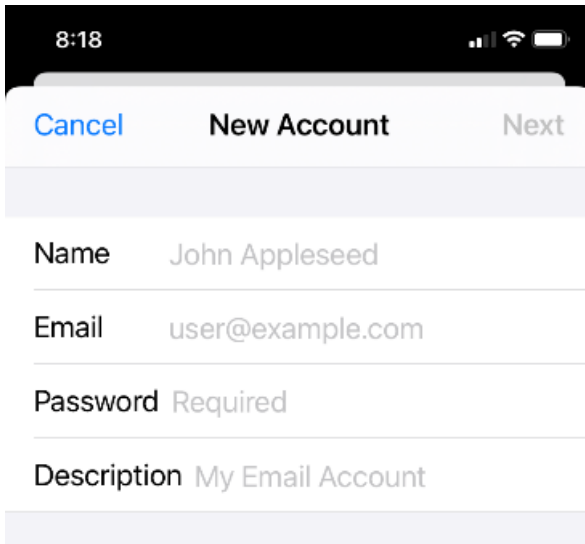

### 3. Scroll down to **Other**

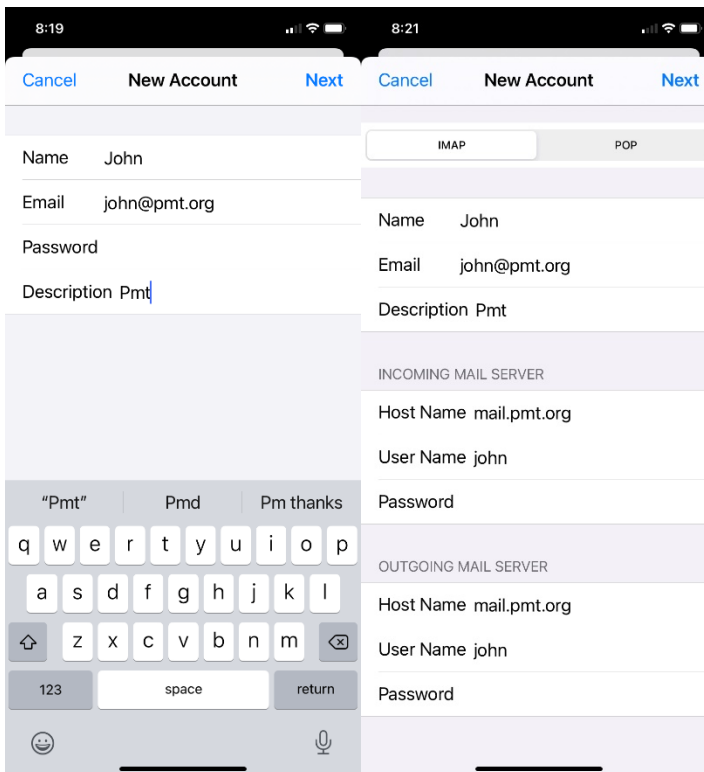

### 4. Choose **Add Mail Account**

### 5. Insert your email information

6. Select whether this is IMAP or POP email at the top, and insert the information below
7. **IMPORTANT!!** Where it says optional, you must put the information in otherwise email will not work properly!!!

8. Hit **Next**, and your email should be set up.
